I.5. Consignor/exporter Name Address			
I.6. Consignee/importer Name Address		I.7. Processing plant Name Address Approval number	
I.8. Country of origin Finland	I.9. ISO code FIN	I.10. Country of destination Vietnam	I.11. ISO code VIE
I.12. Place of loading		I.13. Place of destination	
I.14. Means of transport Type: Name of vessel & Voyage number:		I.15. Point of entry	
I.16. Seal number		I.17. Container number	
II Identification of the commodities			
II.1. Nature of the product		II.2. Processed animal protein of (species)	
II.3. Nature of packaging		II.4. Total number of packages	II.5. Net weight
II.6. Batch production reference number			

III Attestation

I, the undersigned official veterinarian, certify that the above mentioned processed animal protein complies with the following sanitary requirements:

1. the processed animal protein was produced in a plant approved and supervised by the competent authority;
2. the processed animal protein is suitable for use as feed material;
3. the animal by-products used as raw material for the processed animal protein were treated in accordance with the relevant European Union and Finnish legislation on animal by-products;
4. the processed animal protein was examined by random sampling of at least five samples from each processed batch taken at the processing plant. The sample results comply with the following microbiological standards:
 - 4.1 *Salmonella*: absence in 25 g, n=5, c=0, m=0, M=0⁽¹⁾
 - 4.2 *Enterobacteriaceae*: n=5, c=2, m=10 cfu/g, M=300 cfu/g⁽¹⁾;
5. the processed animal protein does not contain protein of ruminant or lagomorph origin;
6. the processed animal protein was manufactured at a processing plant that does not process any material of ruminant or lagomorph origin; and
7. the products were handled, produced, packed and stored under sanitary conditions in accordance with the European Union and Finnish legislation.

Name clarification and official position in capital letters

⁽¹⁾ n = number of samples to be tested;
m = threshold value for the number of bacteria; the result is considered satisfactory if the number of bacteria in all samples does not exceed m;
M = maximum value for the number of bacteria, the result is considered unsatisfactory if the number of bacteria in one or more sample units is M or more; and
c = number of samples the bacterial count of which may be between m and M, the sample still being considered acceptable if the bacterial count of the other samples is m or less.

⁽²⁾ The signature and stamp must be in a different colour to that of the printing.
